## Bugs found:

**Heuristic:** *"Aesthetic and minimalist design"*

**Bug #1:** Contact page is unnecessary and takes up navigation bar real estate.

**Fix:** Remove contact page and create a footer.

**Heuristic:** *"User control/freedom"*

**Bug #2:** No way for user to return to main menu when on product page.

**Fix:** Add return to menu button on product page (see figure 1.1)

**Heuristic:** *"Match between system and real world."*

**Bug #3:** For glazing option, it says "description" which can be confusing to users (see figure 1.1).

**Fix:** Change "Description" to "Choose glazing" to clarify what the dropdown menu entails

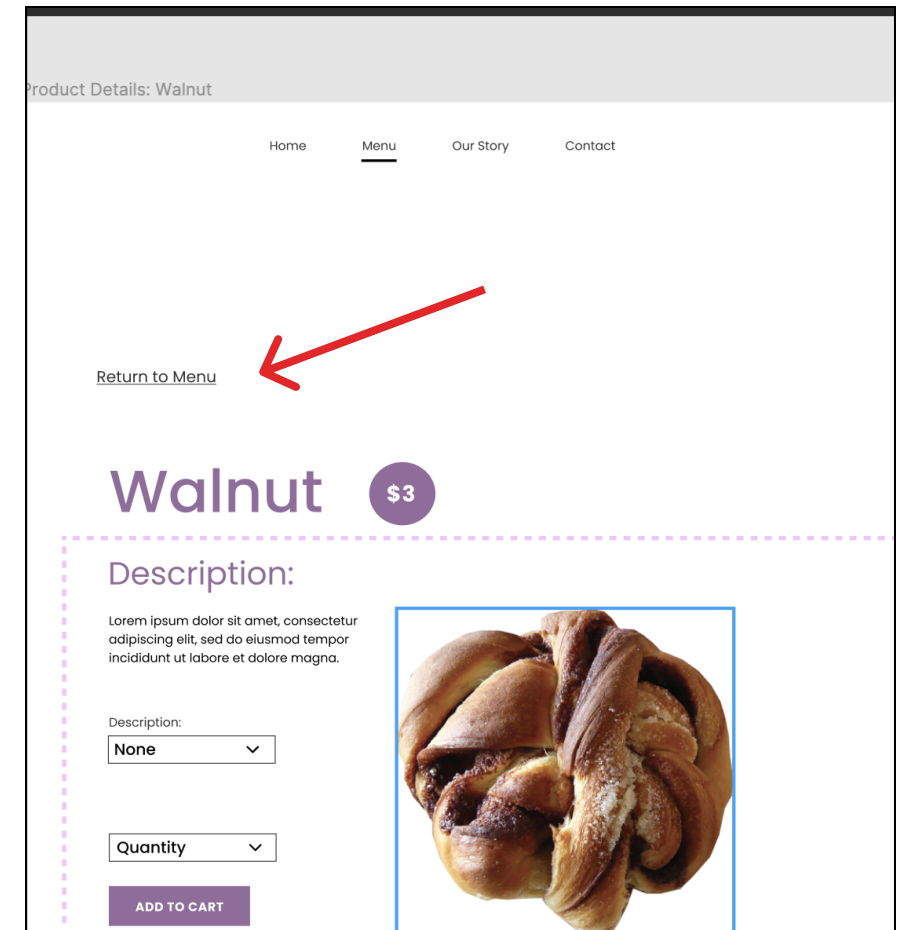

Figure 1.1

# Challenges

## Pixel-pushing:

*I spent more time than I'm willing to admit pixel pushing, and doing math to ensure the elements appear on the web pages in the right position. Looking back it would've probably been easier to use flexbox instead of having to resort to position:absolute for most elements.*

## Browsing experience:

*Creating a browsing experience with static pages proved to be a challenge, since a slideshow is interactive by nature.*

## Unusually long CSS page and confusing class and id names:

*My long CSS page and poorly named classes and ids produced a number of bugs throughout the process, and made things much more complicated than they needed to be.*

*To work around this issue, I continued playing with the top and bottom margins until the elements were positioned correctly.*

*Created arrow images in Illustrator and linked to separate menu page with the <a href> element.*

*Went through my CSS code and added comments to organize it and changes the id and class names to helpful names.*

# Solutions

# Brand Identity

## Bun Bun Bake Shop

Located in the heart of Pittsburgh, Bun Bun Bake Shop offers a wide range of hand-crafted, sweet cinnamon rolls.

[VIEW MENU](#)

- Bun Bun Bake shop is an 40+ year old bake shop that has served as a cornerstone of the Pittsburgh community for decades.
- The client wanted to break out of it's antiquated identity with a fresh and fun look that appeals to the younger generation.
- The website offers a clean, minimalist design and makes the product the focus - perfect for college students on the go.
- The site doesn't overload user with unnecessary information.
- Features a fun, and bright palette to refresh the identity of the small, mom and pop business.
